BT-HUB DATA Scientists Community

9th February, 2026

Dear NFTI

Warm greetings from BT-Hub Nigeria.

Following our meeting and deliberation held on the 21st January, 2026, we are pleased to formally propose a strategic partnership with your esteemed organization as a **Key Steering Organization** for the planning, organization, and hosting of the **Nigerian Data Scientist Conference (NDSC-SEATH 2026)**, proposed to hold from 17th to 19th July, 2026, in Kaduna State.

This national conference serves as a flagship platform to advance data-driven solutions for Nigeria's socio-economic development. We seek to collaborate closely with the Natview Foundation for Technology and Innovation (NFTI) as organizing partner to deliver a world-class and sustainable event.

The conference will focus on applying data science and analytics to address critical national challenges in:

- Security
- Education
- Agriculture
- Technology
- Health (SEATH)

Our shared objective is to strengthen Nigeria's digital economy and position data science as a key driver toward achieving a Data Driven Sustainable Digital Economy by the year 2030.

Through this partnership, we envision:

- Joint planning and governance structures
- Co-branding and shared visibility
- Technical and academic leadership
- Resource mobilization and sponsorship
- Capacity development for emerging data professionals

The conference will convene data scientists, analysts, researchers, policymakers, innovators, and industry leaders from all states of the federation, fostering cross-sector collaboration and national impact.

We believe that your organization's expertise and reputation will significantly enhance the success, credibility, and sustainability of this initiative. Kindly accept this proposal as an expression of our commitment to long-term collaboration in building Nigeria's data ecosystem.

Attached is a concept note for the conference.

COCEPT NOTE

1. **Background**
   Nigeria's development agenda requires strong data-driven systems to address challenges in agriculture, security, education, technology, and health. Despite growing interest in data science, there remains limited coordinated platforms for collaboration, innovation, and policy engagement.

The Nigerian Data Scientist Conference (NDSC-SEATH) is designed to bridge this gap by convening stakeholders to co-create sustainable digital solutions for national development.

1. **Conference Theme**
   "NDSC-SEATH: Data-Driven Solutions for a Sustainable Digital Economy Towards 2030"

2. **Objectives**

- To convene at least 200 data professionals and stakeholders from all geopolitical zones.
- To establish five sectoral innovation teams aligned with SEATH.
- **Development of at least 10 actionable policy and innovation recommendations.**
- Supports Nigeria's digital transformation and innovation agenda.
- Strengthens data capacity for public and private sectors.

3. **Scope and Thematic Areas (SEATH)**
   The conference will develop specialized tracks and teams focusing on:

- **Security:** Crime analytics, intelligence systems, early warning models
- **Education:** Learning analytics, EdTech data systems
- **Agriculture:** Climate data, precision farming, food security analytics
- **Technology:** AI systems, fintech data, smart infrastructure
- **Health:** Disease surveillance, health informatics, medical data systems

4. **Target Participants**

- Data scientists and analysts
- Researchers and academics
- Government policymakers
- ICT professionals
- Startup founders and innovators
- Development partners
- Students and early-career professionals

Participants will be drawn from all states of the federation.

5. **Date and Venue**
   Proposed Dates: 17–19 July 2026
   Proposed Venue: Kaduna State, Nigeria

Structure of the Conference (3 Days)
Day 1: Opening Ceremony, Keynotes, Policy Dialogues
Day 2: Technical Sessions, Workshops, Hackathons
Day 3: Innovation Showcases, Team Presentations, Closing Ceremony

6. Expected Outcomes

- Formation of SEATH innovation working groups
- Policy briefs and technical reports
- National data collaboration network
- Capacity building for emerging professionals
- Strategic partnerships and funding pathways

7. **Partnership Framework**
The conference will be implemented through a multi-tier partnership model involving:

- **Lead Organizers: BT-Hub, NFTI, DSN**
- Strategic Partners: Government agencies, NGOs, Corporates
- Technical Partners: Universities, Research Institutes
- Sponsors and Development Partners

8. Sustainability Plan

- Annualization of NDSC
- Post-conference incubation of projects
- Digital knowledge repository
- Monitoring and evaluation framework
- Continuous stakeholder engagement

We believe this initiative will significantly contribute to Nigeria's digital economy and innovation ecosystem. We look forward to your feedback and possible collaboration in making NDSC-SEATH 2026 a national success.

Thank you for your cooperation.

Yours faithfully,

Badawi
